

Testing Results

Dear Parents/Guardians,

Each school year, the Ohio Distance and Electronic Learning Academy students participate in Ohio's State Tests. These tests provide relevant academic information for all students in relation to their achievement on grade level standards. It is important to provide feedback to our parents and students about their achievements. After completion of a state mandated assessment, reports are sent to the school providing information on the student's results. The school will send those reports home to parents/guardians. Some reports may come during the summer vacation.

For school level assessments such as the NWEA diagnostic assessments, results will be communicated directly with parents during individual parent-teacher conferences. If at any time you have questions regarding your child's assessment results, please contact your student's Principal at 330-643-5503.

Sincerely,

Dr. David Bowlin, Superintendent
